SKILLS

C# · ASP.Net Core · JavaScript · Typescript · React · NextJS · SQL · PostgreSQL · HTML · CSS · Entity Framework · Debugging · Dapper · Repository Pattern · Dependency Injection · Git · Data Processing

INTERESTS

Coding · Drums · Audio Production · Video Games · Video Game Development

Elijah Reck

Junior Developer

Motivated junior developer with a strong focus on C# and ASP.Net Core, and solid experience in React and NextJS. Adept at problem-solving, data management, and API development, I thrive in both independent and team environments. My attention to detail, quick learning ability, and professional communication skills make me a dependable and adaptable team player. Eager to contribute to dynamic projects and continue growing in the software development field.

EDUCATION

Software Development
ITT Technical Institute

09/2014 - 07/2016   *Hilliard, OH*

Contact : Chris Moody - (937) 209-2448

PERSONAL PROJECTS

Excel Parser (06/2024 - Present)
- Gained hands-on experience with React/NextJS, including state management, component design, and client-server communication.
- Enhanced understanding of building robust APIs, implementing the repository pattern, and managing dependency injection.
- Developed skills in transforming and validating complex data structures from Excel files to JSON, ensuring data integrity and accuracy.
- Improved ability to present complex data in a user-friendly format and allow real-time editing, enhancing the overall user experience.

Exercise Tracker (06/2024 - 06/2024)
- Developed a user interface and backend to track exercise data, including start/end times, duration, and notes, providing valuable fitness insights.
- Deepened understanding of common design patterns in software development, particularly the repository pattern.
- Enhanced skills in validating user input to ensure data integrity and consistency.
